

# VISIBLE LIGHT DISINFECTION

## MULTIPLE SOLUTIONS for hospitals and clinics

Light disinfection solutions that fit your environment and needs while keeping you SAFE.

### Suitable for multiple areas

- » Waiting areas – visible light or UVA
- » Operating rooms – visible light and UVC
- » Patient rooms – visible light or UVA and mobile UVC

### Disinfection levels

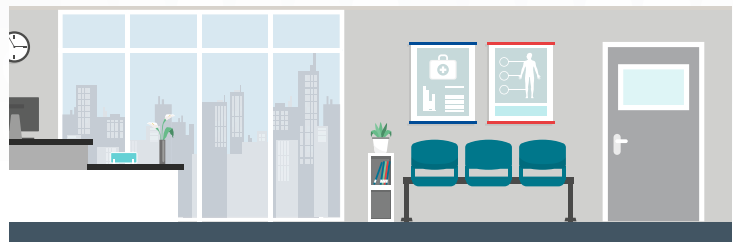

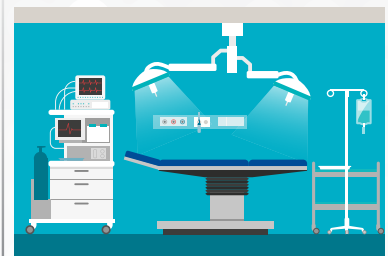

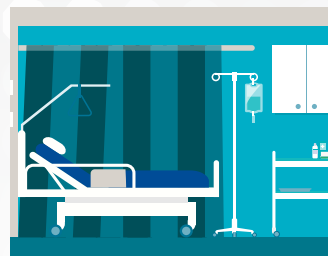

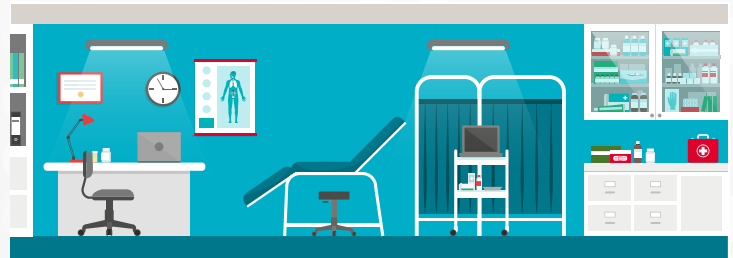

- » UVA – 8-hour or 24-hour occupancy levels, potential to kill viruses
- » Visible light
  - › Allows for continuous occupancy
  - › Has several disinfection levels
  - › Disinfects a wide range of pathogens (no viruses)
  - › Results in no material degradation
- » UVC/broad spectrum UV
  - › NO room occupancy
  - › Up to Class 1 (norovirus) rated
  - › Shortest disinfection time
  - › Available in fixed or mobile Units

### Works on these pathogens and more

- |                    |              |
|--------------------|--------------|
| » Airborne/surface | » Foodborne  |
| › MRSA             | › E. Coli    |
| › Staph            | › Salmonella |
| › Strep            | › Listeria   |
| › Norovirus        | › Shigella   |
|                    | › MRSA       |
